

Ad Sheet: Kyleigh's Cure 9.10.10

Kyleigh Lydon is a 5 year old girl who was born with a rare disorder called galactosemia. There is currently no treatment or a cure for this disorder. Her parents are two local Police Officer's in their community. They have dedicated their lives to finding a cure for their daughter. Currently there is research being done at Children's Hospital Boston to find treatment and a cure.

All of the proceeds from the September 10th event will benefit Children's Hospital Boston. It promises to be a large scale event. We hope that your support will spotlight your company and your concern for our greater communities.
